Ponomarev, V. M.

POWER CHARACTERISTICS OF CONTROL PROCESSES IN SYSTEMS OF AUTOMATIC REGULATION. [1960] 14p. 1 ref.

Order from LC or SLA mi$2.40, ph$3.30 61-10316

Trans. of Akademiya Nauk SSSR. Otd[eleniye] Tekh[nicheskikh] Nauk. Izvestiya: Energetika i Avtomatika, 1959, no. 6, p. 134-140.

General integral relations are presented for the energy consumed or demanded in a control system, particularly one with an oscillatory transient response. Figures illustrate how the energy demand depends on a parameter a specifying the action of the program control (essentially the reciprocal of the time-scale of the program) or on ω, the frequency of a perturbing force. It is shown that the relations are of rather general type, and so may be applied to many different control systems.

(Engineering--Electronic, TT, v. 5, no. 6)

61-10316
